Time to end production bottlenecks and achieve new heights of output?

Any production facility manager knows mistakes and inefficiencies are just part of daily life – but even small hiccups can quickly become extremely expensive errors that drastically effect your output!

Proactive Information Board

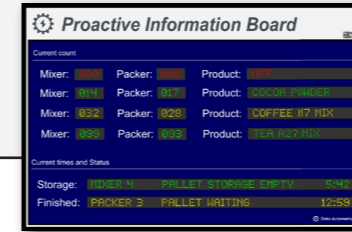

Revolutionising your production line performance

- Empower your operators to remain calm and act intelligently as they anticipate and solve multiple issues before they ever reach critical points.
- No matter your industry, the Proactive Information Board presents **instantly visible, immediately actionable** information that keeps your production processes at **maximum efficiency**.

To remain at the forefront of your industry, your production lines must flow smoothly.

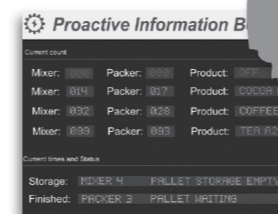

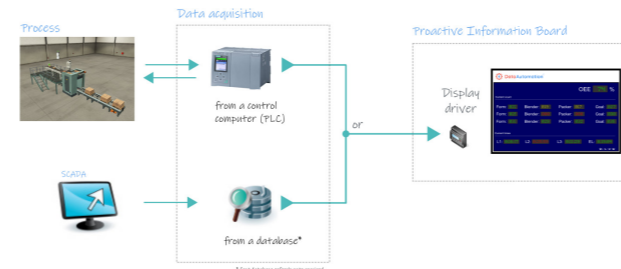

Technical Data

TECHNICAL SPECIFICATIONS

- Crystal-clarity LED display visible from 50-120 metres (depending on board size)
- Green / Amber / Red key clearly represents incident urgency
- Designed for IP65 environments (ATEX / outdoor solutions also available)
- Each bespoke unit designed in collaboration with you to champion your unique needs

Seamless connectivity to existing control computers or powerful base for a new system.

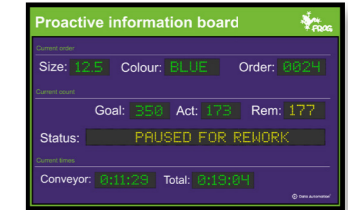

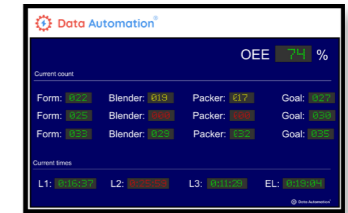

For perfect visibility from a distance, the board must be a certain size. For sizes up to 1x2m, we use heavy-duty welded uPVC.

For bigger or higher-density boards, we use aluminium frames for maximum support and best handling during installation and subsequent moving.

Some Examples

Our ever-growing collective of regarded clients from all sectors unanimously note **significantly increased production line flow** and worker satisfaction since installing their Proactive Information Board.

Revolutionise Your Production Process Efficiency Today!
